- in the bathroom - sink, shower cabin or shower, lavatory pan, mirror, accessories, terracotta on the floor.

The complex is finished.

The town of Primorsko is a favourite destination to thousands of tourists who come here from all parts of the world every summer season. Primorsko is attractive with its favorable climate, beautiful nature, historic and cultural monuments, and hospitable native citizens and last but not least the varied attractions offered to the tourists. Primorsko is the best place for both calm family holiday and for active holiday with lots of parties, good emotions and unforgettable moments.

The restaurants here offer not only the traditional Bulgarian cuisine but also a lot of fish delicacies, barbecue, and pizza. You can listen to live music and enjoy other attractions too.

The most interesting part of the history and the culture of Primorsko is connected with the ancient Thracians who once live in this region. 4

sanctuaries, 12 dolmens and 10 hill necropolises have been discovered here. The most interesting of them is "The Beglik Tash" sanctuary, which reveals the cult of the ancients to the sun.

The town of Primorsko is situated on a small peninsula between the Stamopolo and the Diavolski (Devil's) bays. The landscape is varied and picturesque, a combination of thick forests, large coast beaches and exotic vegetation. Half of the town's beach consists of preserved dunes. From the representatives of the fauna you can see here dolphins, monk-wheels and a great variety of fish.

The nature reserve Ropotamo is situated near the town. The Ropotamo river and the Diavolska River cross the town. The sightseers can visit the world famous nature reserves Vodni lillii (The Water Lillies) and "The Ropotamo", protected areas like the Arkoutino marsh and the Stamopolo marsh and the Perla sand dunes.
